

UHURU GROUP

LANDING PAGE

SPECIFICATION

Phase 1 — V1 Single-Page Website

Prepared by: Sbusiso Nxuseka, Executive, Uhuru Group | May 2026

1. Purpose

This document specifies the requirements for the Uhuru Group V1 landing page — a single-page website designed to establish digital credibility, support business development, and enable first-contact with prospective clients and partners. It is intentionally lean. Complexity is deferred to Phase 2.

2. What We Are Building

Type	Single-page landing website (not a multi-page site)
Navigation	Sticky top nav with anchor links scrolling to each section
Default	Hero — loaded on first visit
Sections	Hero About Services ESG & Impact Metrics Contact
Scope	Desktop and mobile responsive. No portal, login, or CMS.

3. Design Direction

Modern African corporate. Premium but understated. The page should feel like a credible South African holding company — not a startup, not a government portal.

3.1 Colour Palette

Primary	Navy blue (#1B2A4A) — headers, nav bar, CTA buttons, section bands
Secondary	Mid navy (#2E4272) — subheadings, table headers, active states
Background	Light grey (#E8ECF0) — section backgrounds, table rows, content boxes
Text	Near-black (#1A1A1A) for body copy. Mid grey (#6B7280) for secondary text.
White	#FFFFFF — card backgrounds, contrast sections, nav text

3.2 Typography

Font	Inter or Montserrat — modern, geometric, professional
Headings	Bold. 40–52px desktop, scaling down on mobile
Body	16–18px. 1.6 line height.
Labels	Uppercase with letter-spacing for section identifiers

3.3 What to Avoid

- Generic construction templates or startup aesthetics
- Excessive animation or parallax effects
- Stock imagery not reflecting South African environments
- Visual clutter — every element must earn its place

4. Page Structure

The landing page is a single scrolling page. The sticky navigation links jump to each section via anchor IDs. All sections flow top to bottom in the order below.

#hero	Full-width hero — headline, subheading, two CTA buttons
#about	Group overview — who Uhuru Group is, group company tiles
#services	Eight service tiles in a grid layout
#impact	ESG and transformation narrative with bullet points
#metrics	Five key metrics displayed as large visual stat cards
#contact	Enquiry form, contact details, WhatsApp button, map embed

5. Section-by-Section Requirements

5.1 Navigation (Sticky Header)

- Logo left-aligned. Nav links right-aligned.
- Links: About | Services | ESG & Impact | Metrics | Contact
- 'Contact Us' as a filled CTA button in the nav bar
- Hamburger menu on mobile. Full-width dropdown.
- Background: navy blue. Sticks to top as user scrolls.

5.2 Hero Section

- Full viewport height on desktop. 80vh minimum on mobile.
- Background: infrastructure/construction imagery with navy overlay.
- Headline and subheading left-aligned over image.
- Two CTA buttons: primary filled (Our Services) + secondary outlined (Contact Us).

5.3 About / Group Overview

- Two-column layout: text left, group company tiles right.
- Four company tiles: name bold + one-line descriptor each.
- Background: white.

5.4 Services

- Grid: 4 columns desktop · 2 columns tablet · 1 column mobile.
- Eight tiles: icon + service name (bold) + one-sentence description.

- Background: light grey. Cards: white with subtle shadow.
- Tiles are display only in V1 — no individual service pages.

5.5 ESG & Impact

- Two-column: body copy left, bullet points right.
- Optional Uhuru Academy callout card at the base.
- Background: white.

5.6 Metrics

- Full-width navy background section.
- Five stat cards in a horizontal row (scroll on mobile).
- Large bold metric + descriptor in smaller type below.
- White figures on navy background.

5.7 Contact

- Two-column: enquiry form left, contact details right.
- Form fields: Name, Company, Email, Phone, Enquiry Type (dropdown), Message.
- Submit button: navy blue, full-width on mobile.
- Right column: Phone, Email, Address, LinkedIn.
- WhatsApp floating button across full page (bottom right).
- Google Maps embed below two columns, full width.

5.8 Footer

- Navy background. Tagline centred. Copyright line. LinkedIn icon link.

6. Technical Requirements

Hosting	Any reliable shared or VPS host. SSL mandatory.
SSL	HTTPS enforced. No mixed content warnings.
Mobile	Fully responsive. Tested on iOS Safari and Android Chrome.
Page Speed	Under 3 seconds on mobile. Compress all images.
Contact Form	Server-side submission. Email to Uhuru inbox. CAPTCHA.
WhatsApp	Floating click-to-chat. Pre-populated opening message.
Google Maps	Embedded iframe. Office location pinned.
SEO	Page title, meta description, image alt tags. OG tags.
Analytics	Google Analytics — basic install only.
Social	LinkedIn in nav and footer. No other platforms in V1.

7. Explicitly Out of Scope — V1

The following are deferred to Phase 2. Do not build or propose these in V1.

- Multiple separate pages
- CMS or blog functionality
- Client portal or login system
- Advanced SEO infrastructure
- E-commerce or payment integration
- Animations beyond simple CSS transitions
- Custom illustration or motion graphics

8. Delivery Requirements

Deliverable	Fully deployed, live landing page at agreed domain
Testing	Chrome, Safari, Firefox, Edge — desktop and mobile
Handover	Hosting credentials, domain access, source files
Warranty	30-day bug-fix period from launch date
Timeline	V1 achievable within 2–5 days from brief sign-off
